I'm fine with that approach.

Larry,

See below. I recommend that David Appanian and I jump on a call with the reporter to walk him through how to pull the data he wants from ECHO. I'll be sure to keep the conversation focused on the how to use the system and follow-up with him separately if he tries to ask any substantive questions. Are you OK with me proceeding or do you have other thoughts on how to handle?

Boy, that was easy. Nah, I'm old. I can't figure it out. I went to the search page, Pulled up Dupont on the map, tried to get compliance information for the last five years. Nothing materializes.

Thanks for the response, Davina. One more request. Is it possible to go back into Echo farther than what is shown in the information I provided you? I was hoping to see any violations each quarter since Jan. 1, 2003.

On Wed, Feb 14, 2018 at 4:57 PM, Marraccini, Davina <Marraccini.Davina@epa.gov> wrote:

Greg,

Please see the response to your inquiry below.

The following violations are reported in ECHO for the period of 01/01/2016 thru 12/31/2017:

Clean Water Act (CWA)

- 71 Discharge Monitoring Report (DMR) non-receipt violations (about 15% of the expected monthly DMR values). These missing values are what caused the Facility SNC/RNC History to display in ECHO as "N(RptViol)" which is "RNC/Category II - reportable noncompliance"
- The violations are for missing DMR data at:
 - An internal monitoring location
 - The permitted discharge location
 - Upstream and downstream monitoring locations

- Since non-receipt violations are not technically "effluent" violations, ECHO will not display which parameters are missing data

Resource Conservation and Recovery Act (RCRA)

- Two violations of container labeling requirement in RCRA Subpart 268 E. Specifically, Chemours failed to label containers of hazardous waste to identify their contents and/or failed to mark containers of hazardous waste with the date upon which each period of accumulation begins.

As NCDEQ has delegated enforcement authority for both CWA and RCRA, they would best be able to answer questions about the violations listed in ECHO (which they report to EPA).

Hi Megan, I was wondering whether you could help me out with this, or point me to someone who could. This is from the EPA Echo site that shows violations at Chemours every quarter since 1-1-16. I can't seem to figure out how to see the actual violations.

Here's the web link.

<https://echo.epa.gov/detailed-facility-report?fid=NC0003573&sys=ICP#pane3NC0003573>

Thanks,

Greg
